Catur-hendra 💼

I am college student with a strong passion for web development. I've gained proficiency in programming languages like PHP and JavaScript, worked with frameworks such as Laravel, and utilized tools like Tailwind and jQuery. I'm known for my honesty, discipline, and teamwork skills. Additionally, I've acquired valuable project experience, including working on "Cumtech" (a point-of-sale system) and "CARO" (an e-classroom application). Currently, I'm working as a freelance programmer, eager to learn more, and excited to contribute to this ever-evolving field of web development.

Work Experience

OCTOBER 2019 – MAY 2020
