I am college student with a strong passion for web development. I've gained proficiency in programming languages like PHP and JavaScript, worked with frameworks such as Laravel, Nextjs and utilized tools like Tailwind and jQuery. I'm known for my honesty, discipline, and teamwork skills. Currently, I'm working as a freelance programmer, eager to learn more, and excited to contribute to this ever-evolving field of web development.

Work Experience

OCTOBER 2019 – MAY 2020
Junior Web Developer (Intership & Employee)
Nusa Indo Technology
- Providing support in the development of the Jambu Luwuk HRIS website.
- Creating an informative and detailed user guide book for the websites.
- Offering on-site field support to personally engage with clients, address their needs, and ensure satisfaction.

JANUARY 2020 – NOW
Programmer (freelancer)
Carotech
- Assisting in the development of customized software programs tailored to the client's specific requirements.
- Teaching clients to understand the program's functionality and workflow.
- Collaborating and consulting with clients to gather project requirements and objectives, and offering solutions and recommendations to meet their needs effectively.
- Debugging and troubleshooting issues that may arise during the program's development and implementation.

Project & Organitation Experience

Organitation Public Relation / PKKMB Fakultas Teknik Universitas Negeri Surabaya 2023
